

**ECHO Lake Aquarium and Science Center  
Chaperone Information Sheet**

Chaperone's Name \_\_\_\_\_

Thank you for agreeing to be a chaperone for your group's field trip to ECHO. Our mission is to educate and delight our guest about the **E**cology, **C**ulture, **H**istory and **O**pportunities for stewardship in the Lake Champlain Basin. As you move through our exhibits with the students encourage them to ask questions. You do not need to know the answers. Ask them to go discover and explain to you what they learn.

Please review the following expectations for visiting groups:

- Students are required to have adult supervision at all times.
- Exhibits and animals need to be treated with respect. Reinforce the rules for indoor voices, controlled bodies and no tapping on the glass or taunting the animals in their homes.
- No food in the exhibit spaces. This includes gum and candy. Gum dropped into an animal tank can be bad news for its inhabitants.
- ECHO staff is on hand for emergencies, first aid, help locating lost children and other assistance. Don't hesitate to ask for help when needed.
